

Internet and Digital Imaging

Cluster of Modules

C8459 Access and Use the Internet

C8785 Detect and Protect from Spam and Destructive Software

C8846 Send and Retrieve Information using Web Browsers and Email

C8461 Capture a Digital Image

Description

Students will learn how to identify and use local and remote resources. This cluster also teaches students to identify common types of destructive software and to install virus protection software and software updates on a regular basis. It also addresses the common types of spam and how to take appropriate action in regards to spam. Students will also learn how to capture digital images and make adjustments to image composition and exposure.
